

**Application for the scientific use of sensitive variables
under data protection law in conjunction with a Scientific Use File (SUF) /
Campus File (CF) from the Research Data Centre at BIBB (BIBB-FDZ)**

The following standardised application supplements the regulations for the use of a SUF or CF. It is intended for researchers who are already using such an application and who would like to use sensitive variables under data protection law for their scientific research purposes.

As with SUF applications, in the vast majority of cases this application will become a user agreement with the approval of the BIBB-FDZ. Only in the case of highly sensitive variables under data protection law does the BIBB-FDZ reserve the right, following the relevant check of this application, to stipulate a detailed and independent user agreement as an access requirement for guest researchers.

Please do not hesitate to contact the BIBB-FDZ if you have any questions regarding the applications for data use:

Tel. +49 - (0)228-107-2041 | E-Mail: fdz@bibb.de

For internal use only by employee of the Research Data Centre

Data access is approved not approved

Application for data use

1. Information about SUF use¹:

Data set	
Name of applicant	
Telephone number	
Title of research project	

2. Subject matter:

Name(s) of variables	
Short description of purpose	

I have used the Internet pages of the BIBB-FDZ to find out about the guidelines and the legal requirements which are also accessible [here](#) and undertake to observe these when working with the data. The access to data is restricted to scientific research purposes within the scope of the information provided for the use of the SUF.

Place, Date

Signature

¹ Under 1, please repeat the relevant information from your SUF/CF application in order to ensure this is correctly assigned within the BIBB-FDZ.
